SEMINAR

Operational Excellence for Chemical Operations through Modernization and Digitization

Chemical companies must find innovative ways to optimize their assets and boost profitability. This seminar focuses on how automation, digital solutions, and advanced services can modernize and enhance project execution. By leveraging the right strategies and technologies, companies can maximize asset performance and achieve operational excellence. Additionally, the seminar will explore strategies for enhancing chemical operations security in the modern era, ensuring robust protection against emerging threats.

Join us as Rockwell Automation & Endress+Hauser share best practices to drive operational efficiency into your chemical operations.

KEY TAKEAWAYS

Gain insights on addressing the key challenges in the chemical industry relative to Challenges:

- Market Variability
- Productivity
- Process Safety / CyberSecurity
- ESG / Decarbonization
- Workforce Effectiveness

- Introduction to Reliability tools and assessments that help to supercharge asset performance
- Advantages of electrified and connected assets for efficiency
- Tour a fully operational process unit integrated with Rockwell and E+H portfolio platforms.

Wednesday, January 28th

9:00am - 3:15pm

Endress + Hauser office
Houston, Texas

14525 Kirby Drive, Pearland, TX 77047

Lunch provided
